

THE PHYSICIAN LEADERSHIP SINGAPORE PROGRAM 2012: The Foundational Elements of Effective Physician Leadership

This programme is a process of mobilising people to confront and deal with problematic realities for the purpose of improving the human condition.

YOU WILL LEARN

- Identified and evaluated the effective leadership competencies needed to successfully implement three key Singaporean health care initiatives.
- Deepened their appreciation for the adaptive challenges intrinsic to all technical initiatives and discovered ways to see the personal and organisational opportunities for growth and improvement.
- Increased their awareness of the human dynamics within organisational change initiatives; learned skills to deal with new situations; and identified tactics for effectively leading others through the change process.

COURSE HIGHLIGHTS

1. Creating an Effective Integrated Health Care Environment
2. Building a Team-based Health Care Delivery System
3. Successfully Deploying a National Electronic Health Record System (NEHR)

DURATION

9 days
